**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-10, and 13-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kawamoto et al. (US 5613740).

Kawamoto et al. discloses a hydraulic brake system (see Fig. 2) for supplying a braking output (BsubFL) to a vehicle having at least one wheel, the braking system including a primary valve assembly M configured to receive a manually controlled input 7 that varies the braking output, the primary valve assembly including a first spool valve (the spool valve is within the master cylinder, M) configured to vary the braking output according to the manually controlled input, and a secondary valve assembly 3FL integral with the primary valve assembly (via switch over valve 4FL), the secondary valve assembly being configured to receive input signals from a programmable electronic controller 30, the secondary valve assembly including a second spool valve 15 configured to operate with the primary valve assembly; and an actuator 16 for engaging and actuating the second spool valve according to the input signals received from the programmable electronic controller such that the second spool valve modulates the braking output produced by the primary valve assembly (see col. 5 lines 7-12).

Re claim 4, see electric actuator 16 and col. 3 line 33.

Re claims 5-9 and 13-19, see col. 4 lines 5-10.

Art Unit: 3683

*Allowable Subject Matter*

3. Claims 2-3, and 11-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

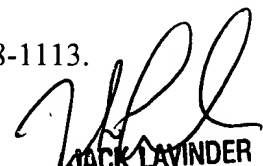

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takata, Ogino et al., Inoue, Leppek, Shirai et al., Farr, Inada et al., Nomura et al., Oyama, Terazawa et al., Schonlau, Kellner et al., Oishi et al., Tsukamoto, Oka et al., Fuchida, Nishii, Kobayashi et al., and Belart et al. disclose related devices.
